## **2. Significant accounting policies**

### *Statement of compliance and basis of presentation*

These interim financial statements for the three and six month periods ended December 31, 2025 and 2024 have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting, as issued by the International Accounting Standards Board (“IASB”).

These interim financial statements do not include all of the disclosures required by International Financial Reporting Standards (“IFRS Accounting Standards”) for annual consolidated financial statements and accordingly should be read in conjunction with the Company’s audited consolidated financial statements for the year ended June 30, 2025 (“annual financial statements”) prepared in accordance with IFRS Accounting Standards.

## **3. Significant accounting judgements, estimates and uncertainties**

These unaudited condensed consolidated interim financial statements were prepared using the same basis of presentation, accounting policies and methods of computation as those of the audited consolidated financial statements for the year ended June 30, 2025. They were prepared using the same critical estimates and judgments in applying the accounting policies as those of the audited consolidated financial statements for the year ended June 30, 2025.

The preparation of the unaudited condensed consolidated interim financial statements requires Management to make judgments, estimates and assumptions that affect the application of accounting policies and reported assets, liabilities, revenue and expenses, consistent with those described in the Company’s annual financial statements and as described in these interim financial statements. Estimates and underlying assumptions are reviewed on an ongoing basis. Estimates are based on historical experience and other assumptions that are considered reasonable in the circumstances. The actual amount or values may vary in certain instances from the assumptions and estimates made. Changes will be recorded, with the corresponding effect on profit or loss, when, and if, better information is obtained.

## 4. Financial instruments

The fair values of the cash, trade and other receivables, other current assets, accounts payable and accrued liabilities approximate their carrying values due to the relatively short-term nature of these financial instruments. The fair values of operating facility and loans approximate their carrying values due to variable interest loans or fixed rate loan, which represent market rate.

Derivative assets and liabilities are recorded at fair value.

Cash and cash equivalents are comprised of:

	December 31	June 30
	2025	2025
	\$	\$
Cash at bank and on hand	17,107	13,494
Restricted cash	16	—
Cash and cash equivalents	17,123	13,494

Cash includes demand deposits with financial institutions and cash equivalents consist of short-term, highly liquid investments purchased with original maturities of three months or less. As at December 31, 2025 and June 30, 2025 the Company had no demand deposits and cash equivalents.

The Restricted cash is held for shares repurchased under the Normal Course Issuer Bid (“NCIB”).

Interest expense (net) comprises of total interest income and interest expense for financial assets or financial liabilities that are not at fair value through profit or loss, and can be summarized as follows:

The Company earns interest income from its liquidable money market deposit account to generate steady cash flows and to manage liquidity. The interest rate on the account is variable based on prevailing market rate.

Note	Three month periods ended		Six month periods ended	
	December 31		December 31	
	2025	2024	2025	2024
Interest income	(106)	(10)	(247)	(21)
Interest expense	14	512	1,037	1,251
Accretion expense	8	70	78	121
Interest expense (net)	476	1,105	1,125	2,483

The Company examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, foreign currency risk, interest rate risk and market risk.

## *Credit risk*

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its obligations. Where possible, the Company uses an insurance policy with Export Development Canada (“EDC”) for its trade receivables to manage this risk and minimize any exposure.

		December 31 2025	June 30 2025
	Note	\$	\$
Trade receivables		<b>9,317</b>	10,631
Proceeds due on sale of VoIP Supply LLC	19	—	4,500
Trade and other receivables		<b>9,317</b>	15,131

As at June 30, 2025, the Company recorded \$4,500 in respect of proceeds due on the sale of VoIP Supply LLC. (note 19), all of which was received during the six month periods ended December 31, 2025.

The Company's maximum exposure to credit risk for its trade receivables is summarized as follows with some of the over 90-day receivable not being covered by EDC:

	December 31 2025	June 30 2025
	\$	\$
Trade receivables aging:		
0-30 days	<b>7,308</b>	9,294
31-90 days	<b>1,368</b>	812
Greater than 90 days	<b>989</b>	1,021
	<b>9,665</b>	11,127
Expected credit loss provision	(348)	(496)
Net trade receivables	<b>9,317</b>	10,631

The movement in the provision for expected credit losses can be reconciled as follows:

	December 31 2025	June 30 2025
	\$	\$
Expected credit loss provision:		
Expected credit loss provision, beginning balance	<b>(496)</b>	(1,369)
Net change in expected credit loss provision during the period	<b>148</b>	873
Expected credit loss provision, ending balance	<b>(348)</b>	(496)

The Company applies the simplified approach to provide for expected credit losses as prescribed by IFRS 9, which permits the use of the lifetime expected loss provision for all trade receivables and contract assets. The expected credit loss provision is based on the Company's historical collections and loss experience and incorporates forward-looking factors, where appropriate.

Substantially all of the Company's cash and cash equivalents are held with major Canadian and US financial institutions and thus the exposure to credit risk is considered insignificant. Management actively monitors the Company's exposure to credit risk under its financial instruments, including with respect to trade receivables.

## *Liquidity risk*

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company has a planning and budgeting process in place by which it anticipates and determines the funds required to support its normal operating requirements. The Company coordinates and align this planning and budgeting process with its financing activities through its capital management process.

The Company holds sufficient cash and cash equivalents and working capital, maintained through stringent cash flow management, to ensure sufficient liquidity is maintained. The following are the undiscounted contractual maturities of significant financial liabilities of the Company as at December 31, 2025:

	<b>within 12 months</b>	<b>13-24 months</b>	<b>25-36 months</b>	<b>&gt;36 months</b>	<b>Total</b>
	\$	\$	\$	\$	\$
Accounts payable and accrued liabilities	15,438	—	—	—	<b>15,438</b>
Sales tax payable	2,993	—	—	—	<b>2,993</b>
Operating facility and loans	20,600	14,038	2,962	—	<b>37,600</b>
Lease obligations on right of use assets	1,730	1,530	1,214	3,889	<b>8,363</b>
Other non-current liabilities	—	—	—	1,244	<b>1,244</b>
	<b>40,761</b>	<b>15,568</b>	<b>4,176</b>	<b>5,133</b>	<b>65,638</b>

## *Foreign currency risk*

A portion of the Company's transactions occur in a foreign currency (Australian Dollar (AUD), Canadian Dollars (CAD), Columbia Peso (COP), Euros (EUR), Great British Pounds (GBP), Indian Rupees (INR), and Philippine Peso (PHP)), therefore, the Company is exposed to foreign currency risk at the end of the reporting period through its foreign denominated cash, trade receivables, contract assets, accounts payable and accrued liabilities. As at December 31, 2025, a 10% depreciation or appreciation of the AUD, CAD, COP, EUR, GBP, INR, and PHP currencies against the U.S. dollar would have resulted in an approximate \$59 (June 30, 2025 - \$58) increase or decrease, respectively, in total comprehensive loss.

## *Interest rate risk*

The Company's exposure to interest rate fluctuations is with its credit facility (Note 14) which bears interest at a floating rate. As at December 31, 2025, a change in the interest rate of 1% per annum would have an impact of approximately \$321 (December 31, 2024 - \$484) per annum in finance costs. The Company also entered an interest rate swap arrangement for its loan facility (Note 14) to manage the exposure to changes in SOFR-rate based interest rate. As described in detail in Note 14, the fair value of the interest rate swaps are a current asset of \$129 and non-current asset of \$4 on December 31, 2025 (June 30, 2025 - current asset of \$254 and non-current asset of \$41).

## **5. Capital management**

The Company's objectives in managing capital is to safeguard the Company's assets, to ensure sufficient liquidity to sustain the viability of the future development of the business via advancement of its significant research and development efforts, to conservatively manage financial risk and to maximize investor, creditor, and market confidence. The Company considers its capital structure to include its shareholders' equity and operating facilities and loans. Working capital is optimized via stringent cash flow policies surrounding disbursement, foreign currency exchange and investment decision-making. There have been no changes in the Company's approach to capital management during the period, and apart from the financial covenants as discussed in Note 14, the Company is not subject to any other capital requirements imposed by external parties.

## **(b) Derivative assets and liabilities**

The Company uses derivative financial instruments to hedge its exposure to interest rate risks. All derivative financial instruments are recognized as either assets or liabilities at fair value on the condensed consolidated interim statements of financial position. Upon entering into a hedging arrangement with an intent to apply hedge accounting, the Company formally documents the hedge relationship and designates the instrument for financial reporting purposes as a fair value hedge, a cash flow hedge, or a net investment hedge. When the Company determines that a derivative financial instrument qualifies as a cash flow hedge and is effective, the changes in fair value of the instrument are recorded in accumulated other comprehensive loss, net of tax in the condensed consolidated interim statements of financial position and will be reclassified to earnings when the hedged item affects earnings.

The interest rate swap arrangement with two banks became effective on January 31, 2020, with a maturity date of December 31, 2024. The notional amount of the swap agreement at inception was \$17,400 and decreases in line with the term of the loan facility. Effective March 31, 2022, Sangoma US Inc. entered into a fixed rate swap transaction worth \$43,750 over a five year period and terminating on February 28, 2027. As of December 31, 2025, the notional amount of the interest rate swap was \$10,938 (June 30, 2025 - \$15,313). The interest rate swap has a weighted average fixed rate of 1.80% (June 30, 2025 - 1.80%) and have been designated as an effective cash flow hedge and therefore qualifies for hedge accounting.

As at December 31, 2025, the fair value of the interest rate swap assets were valued at current of \$129 (June 30, 2025 - \$254) and non-current \$4 (June 30, 2025 - \$41). The current and non-current derivative assets were recorded in the condensed consolidated interim statements of financial position.

The fair value of interest rate swap is determined based on the market conditions and the terms of the interest rate swap agreement using the discounted cash flow methodology. Any differences between the hedged SOFR rate and the fixed rate are recorded as interest expense on the same period that the related interest is recorded for the loan facility based on the SOFR rate.

## **19. Disposal of VoIP Supply LLC**

As disclosed in note 20 of the annual financial statement for the year ended June 30, 2025, during fiscal 2025, the Company initiated plans for the disposal of substantially all of the assets and liabilities from VoIP Supply LLC, as part of its strategic realignment. In accordance with the criteria set out in IFRS 5, the Company determined that the assets and liabilities at VoIP Supply LLC met the criteria of a disposal group.

The associated assets and liabilities within the disposal group were measured at the lower of their carrying amounts and fair value less costs to sell. VoIP Supply LLC did not represent a separate operating segment under IFRS 8, as the Company considers the entire business of the Company from a single operating segment perspective and assesses the performance of the segment based on measures of profit and loss as well as assets and liabilities. As a result, the operating results of VoIP Supply LLC were not determined to meet the criteria of a discontinued operation under IFRS 5.

On June 30, 2025, the Company completed the sale of the VoIP Supply LLC to PVG Technology Holdings, LLC for a total aggregate purchase price of \$4,500 (the “Transaction”) which was recorded as a receivable at June 30, 2025 and collected during the six month periods ended December 31, 2025.
