

Deployment model

# Sangoma UC: On-prem

(Switchvox On-Premises)

**1** Users communicate through desk phones, mobile apps or soft phones on their laptops/PCs via local switch/firewall.

**2** Calls from remote offices are sent via the public internet.

**3** All calls are sent to their onsite **Switchvox appliance** that performs all the tasks need to handle call flows, configurations and features and connects directly to the Public Switched Telephony Network (PSTN) via SIP trunks.
